BI-FOLDING DOORS

*Open up your living space
to the great outdoors*

MUCH MORE THAN A WINDOW

Large openings for a new way of living

FLEXIBLE AND FLOODED WITH LIGHT

All Solarlux Bi-Folding doors are bespoke, but they also have one thing in common: they allow you to open up your living space along almost its entire length. Unlike conventional sliding doors, Bi-Folding doors can fold into a slim block of panels, much like an accordion. Thanks to their extremely low-maintenance carriage technology, opening and closing the smooth-running panels is child's play. This is just one of the features that makes the Bi-Folding door the modern alternative to traditional patio doors.

The Bi-Folding door is available in many colours and variants

Perfect: the large opening presented by the Bi-Folding door

Maximum planning freedom meets premium quality

THE SECURITY OF EXPERIENCE

The Bi-Folding door has been at the heart of the Solarlux product range for more than 30 years. This wealth of experience has made it a versatile, high-quality product that has no trouble fulfilling any requirements in terms of security, transparency or ease of use. Its optimum thermal insulation when closed keeps your rooms cosy and warm, while it also complies with the requirements of the strictest European safety standards and is certified for protection against wind and driving rain.

The perfect solution for any requirement

ONE SYSTEM, ENDLESS POSSIBILITIES

Thanks to the variety of material choices, such as durable aluminium, wood or wood/aluminium, and its huge range of design and configuration options, the Bi-Folding door is a true all-rounder. As a wide opening onto the garden from your living space, a solution in your wintergarden, a swimming pool glazing option or a partition - the Bi-Folding door can be used almost anywhere. Opening to the inside or the outside, folding to the left or the right, and with additional tilt-and-turn panels and fixed elements, it offers you huge creative freedom when designing your space.

Huge range of application possibilities for the Bi-Folding door
