

## VERTICO All-rounder with multi-comfort.

The Vertico lateral running door is the extraordinary solution to cover garage openings up to a width of 562 cm in an intelligent way. The standard equipment comprising motor, radio remote control and integrated obstacle detection gives proof of comfort and safety.

### The Vertico garage door system - Overview

- › Complete aluminium garage door
- › Custom-made to the millimetre
- › Space requirement in the lintel area can be minimized to 5 cm
- › 12 standard colours and 36 special Renolit colours
- › Up to an opening width of 562 cm
- › Radio remote control and motor unit as standard
- › With integrated obstacle detection
- › 2 openings can be programmed (passage door effect)
- › Interior garage light
- › Emergency unlocking from inside as standard
- › Motor unit with **AÖS** (opening protection)
- › Only 13 cm space requirement for the side turn radius
- › No lost space in front of the garage. The door does not swing out
- › Most silent travel due to **LLS** (silent run system)
- › Very high stability due to vertical profiles
- › Certified by TÜV (Technical Inspection Authorities), produced according to DIN-EN safety standards
- › Solar- or battery powered (subject to surcharge)
